

BYG'S LEARNING RESOURCE PLATFORM

# A quick guide to the LRP

## The challenge

Engaging employees with learning isn't easy. People are busy and asking them to complete training alongside their day-to-day work can be met with resistance.

On top of this, most learning management systems aren't intuitive to use and there is little focus on making the learning enjoyable.

## The solution!

BYG's Learning Resource Platform (LRP) is changing all of that by creating personalised learning experiences and bringing in familiar social features to drive engagement.

The LRP delivers:

- Clear and structured learning
- Relevant personalised content
- Positive reinforcement through rewards
- Engagement social learning features
- Higher ROI on your digital learning investment

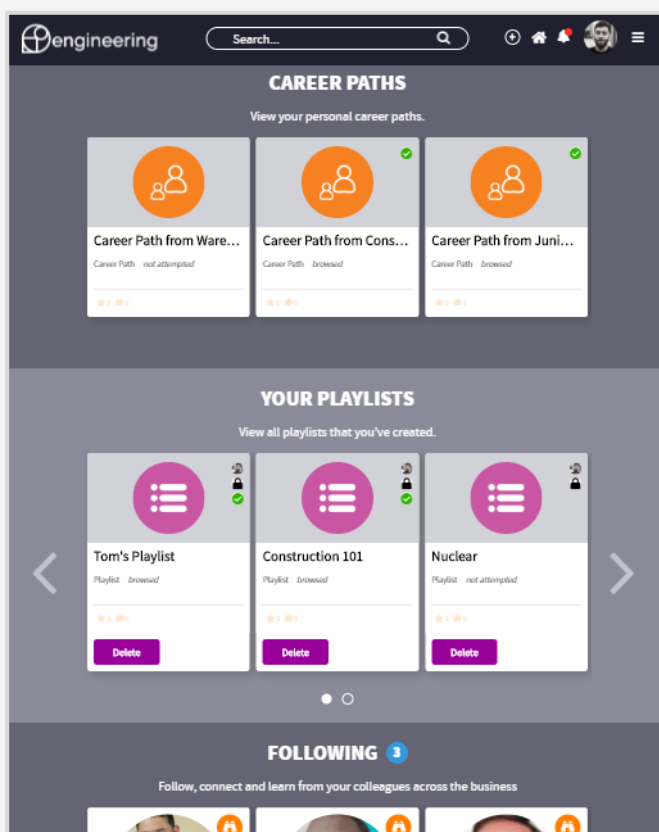

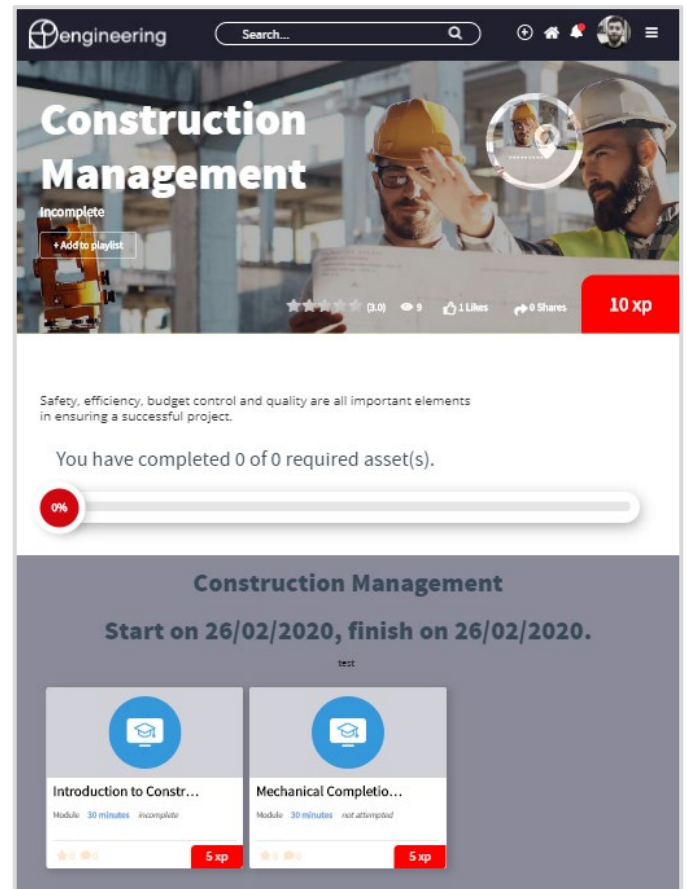

## Key features

Upskill learners in career requirements and key skills more efficiently with Learning Paths and Playlists.

## Learning Paths

- Remove the need for learners to search through materials – provide **relevant materials at the right time**.
- **Progress learner skills** and knowledge more efficiently.
- **Gamification badges**, experience points and **leaderboards** increase engagement and make learning fun.

## Playlists

- The learner is in control of **building their own plan**, saving useful resources for their next session.
- **Playlists are shareable**, encouraging wider participation.

## Career paths

- Career Paths show learners exactly what they need to learn to reach their goals.

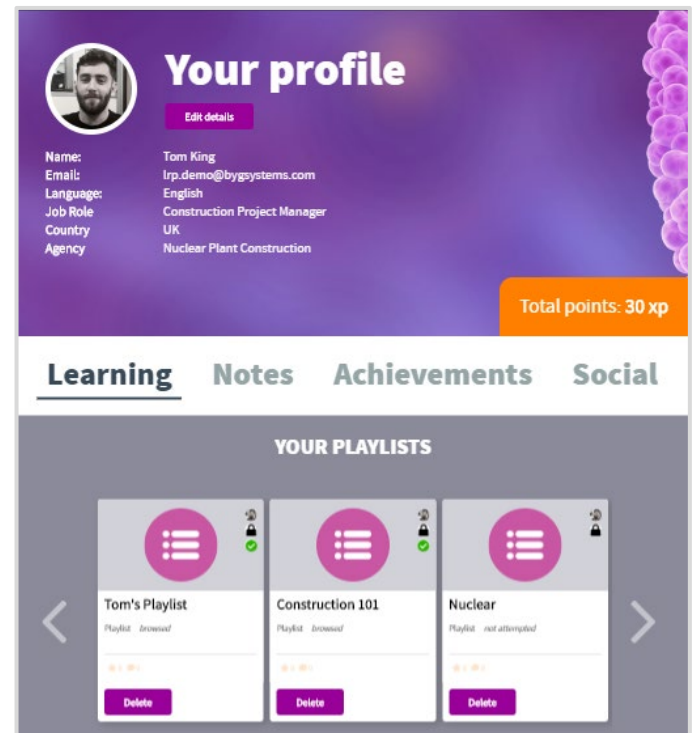

**Talent is developed, not lost.**

## Social learning

The LRP uses familiar social features which allow learners to share resources, paths and playlists with colleagues.

Learners can see what they are getting out of their activity and are motivated to invest more time in their continuing professional development.

- Share and rate content
- Tag colleagues
- Like and comment on others' content

## Built for business

On the back end, the intuitive visual administration tool makes it easy for managers to:

- Create and assign learning paths
- Manage resources
- Update user information
- Analyse usage and results

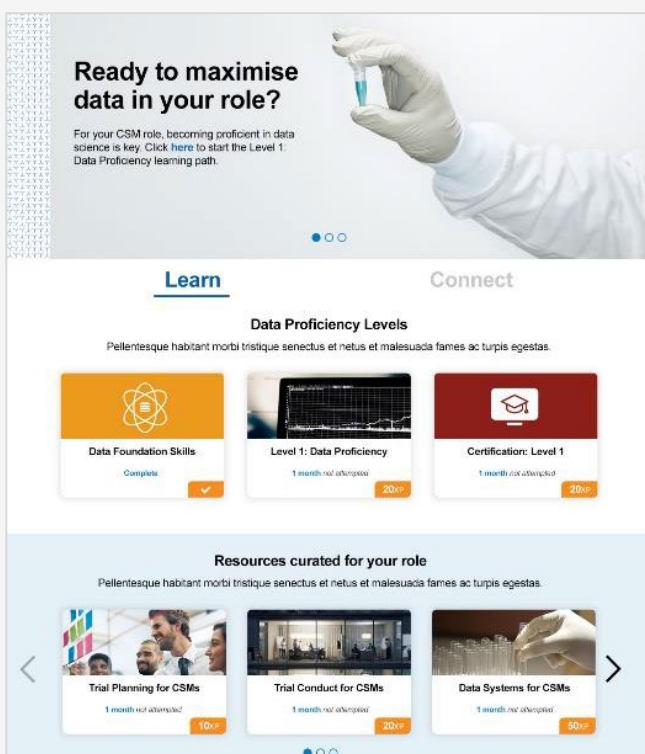

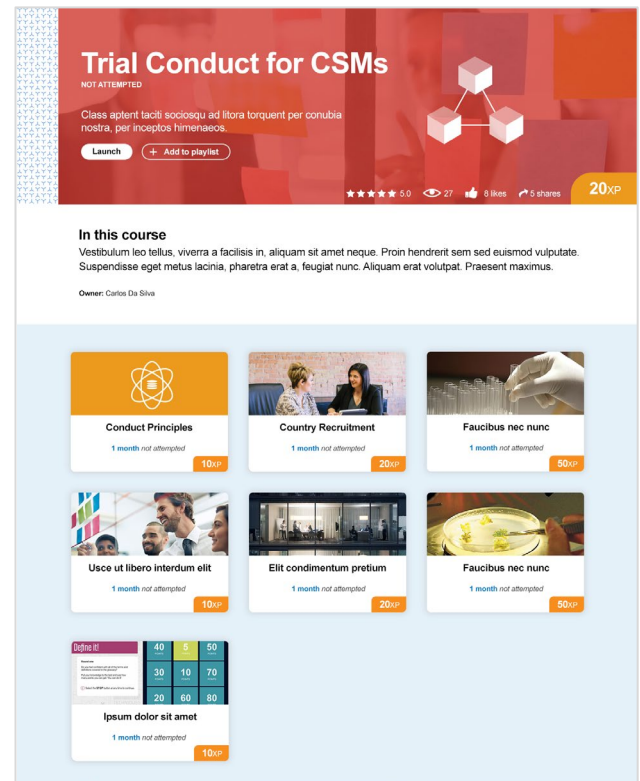

## Flexible hosting and customisation

You get more for your money with the LRP compared to other platforms, because we tailor it to YOU rather than trying to adapt an 'off the shelf' product.

The LRP can be hosted on your servers – or we can host it, if preferred.

Learners can access their resources whenever they need to, even without WiFi. LRP content can be saved and completed offline - removing limits on learning.

## Rich customisation

Our LRP can be completely tailored to your branding and design needs.

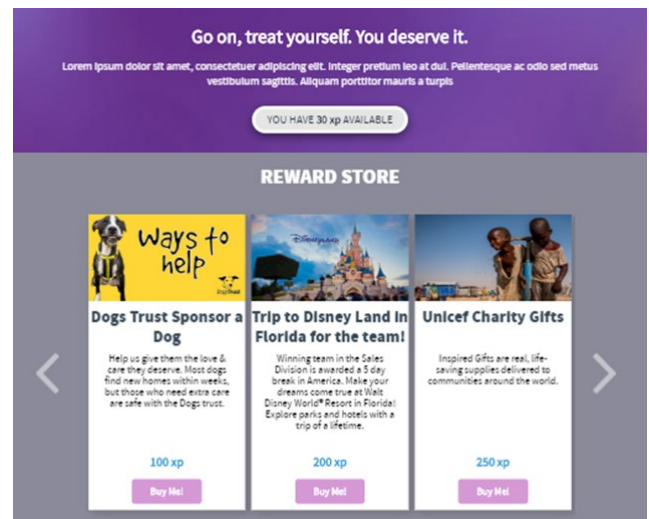

We offer even richer customisation than that though. Unlike most other learning platforms, we can add bespoke functionality and features depending on your unique needs.

This means you can create unique LRP solutions for your organisation, department or even specific learning initiatives.

## Learner Rewards

For completing learning, we want to give learners more than digital rewards.

Our **configurable and customisable Rewards Store** means organisations can offer gifts and other incentives for learners to earn as they work.

## Working with you to ensure success

**To help you get started, we've got 30 years' experience to support in the creation of new assets or the configuration of learning experiences within the platform.**

This is where we really stand out from our competitors – a lot of other products are simply a platform that is given to clients and then it's over to them to make it work.

### BYG Support Services

We are a partner from start to finish.

- We can support you in auditing and leveraging the assets you have into curated and effective learning.
- We have the in-house capability and expertise to create new resources and content specific to their learning needs.
- Our learning design team can support the configuration of courses, collections and learning paths within your LRP, to ensure structured and engaging learning.
